### Why companies choose this firm

Direct engagement from kickoff through submission. Requirements mapped early. Compliance built in from day one. Your story stays in your voice, tied to outcomes, past performance, and evaluator clarity.

[Senior-led delivery](#)

[Registered Practitioner guidance](#)

[Requirements-first workflow](#)

# A large-firm result without large-firm overhead.

Federal Bid Partners LLC was built after watching capable contractors get overcharged, delayed, and buried in layers. We stay closer to the work, so the process feels tighter, cleaner, faster to trust, and easier to act on.

## What clients feel

The process feels calmer, clearer, and more deliberate because requirements, compliance, narrative, and packaging stay aligned instead of fragmented.

## Why boutique wins here

You are not passed between rotating layers. Questions get answered earlier. Compliance gets handled sooner. The final package reads cleaner because the work stays close to the people actually doing it.

### Senior attention

Direct engagement from kickoff through submission. No rotating bench.

### Lean and transparent

Time only where it adds evaluative value. Clear pricing, milestones, and scope.

### Built-in compliance

GSA/FAR and CMMC/NIST are baked in from day one, not patched later.

### Your voice, not ours

Submissions read like your team, rooted in outcomes and past performance.

## Credentials that strengthen delivery

### Registered Practitioner

CMMC guidance is backed by a Registered Practitioner for cleaner readiness planning and stronger credibility.

### Bachelor's or master's degree

Every writer assigned to delivery holds at least a bachelor's or master's degree.

### Shipley certified writers

Proposal and grant writers are Shipley certified, bringing structured method and reviewer-conscious discipline.

### Senior-led delivery

Your work stays with senior support from kickoff through submission, without a rotating bench.

## How the work stays clean

Fast triage → clear plan → confident execution

At Federal Bid Partners, the work stays senior. Requirement mapping, narrative development, compliance checks, and final packaging all remain aligned so quality stays obvious from kickoff through submission.

### No rotating bench

Senior-led delivery

### Compliance first

Built in early

### Cleaner handoffs

Less avoidable rework

### Real narrative fit

Your voice preserved

Boutique partner led by former big-firm proposal and compliance leads who prefer precision over overhead. Specialists in Proposal Development, GSA MAS strategy, and CMMC Level 1 / 2 and NIST SP 800-171 guidance.

## CMMC and NIST support with a clear deliverable path.

CMMC is the cybersecurity framework used to verify that contractors handling Federal Contract Information or Controlled Unclassified Information have the right protections in place. NIST SP 800-171 is the deeper security baseline often tied to CUI environments. Together, they shape eligibility, buyer confidence, and readiness.

### Why CMMC matters

### Cybersecurity packages

#### CMMC Level 1

Best fit

**\$2,000**

For teams handling FCI that need a fast, clean Level 1 finish.

- Scope + boundary definition
- 17-practice review and gap plan
- Evidence checklist + library structure
- Submission / attestation readiness guidance

#### NIST SP 800-171

**\$2,000**

For teams that need a structured baseline for CUI-handling environments.

- Gap assessment across requirements
- SSP draft/update guidance
- POA&M support and sequencing
- Evidence map + collection guidance

#### CMMC L1 + NIST Bundle

Best value

**\$3,000**

For teams that want one combined, practical package instead of duplicate work.

- Combined scoping + documentation
- Evidence mapping across both tracks
- Reduced friction and duplicated effort
- Stronger foundation for future maturity

#### CMMC Level 2

Assessor-ready

**from \$8,500**

For organizations building a defensible, assessor-ready package around boundary, evidence, and remediation maturity.

- Boundary + assessment plan
- NIST SP 800-171 aligned gap review
- SSP + POA&M support
- Evidence mapping + library build

#### Platform option: CMMC Pulsar

**\$399 / year**

A guided compliance platform for CMMC Level 1 that supports intake, scope, gap analysis, remediation, evidence tracking, and export in one coherent workflow.

- Keeps evidence attached to the requirement
- Reduces scattered files and duplicate work
- Makes internal handoff easier

## What proposal support is when it is built to win cleanly.

Strong proposal support is not only drafting. It is requirement mapping, narrative structure, compliance protection, packaging, and a final submission that reads clearly under evaluation. The goal is a cleaner path from opportunity to confident submission.

### What strong proposal support includes

#### Requirements

Map what is actually scored and organize inputs before drafting begins.

#### Narrative

Shape the story around outcomes, differentiators, and proof.

#### Compliance + QA

Protect the package before submission with structure, checks, and final review.

#### Submission polish

Deliver a cleaner final package that reads clearly under evaluation.

### Annual proposal / grant packages

#### Starter Plan

Entry

**\$4,500 / year**

For smaller firms that want a clean, affordable support lane.

- 1 proposal / month
- 3 matched opportunities / month
- Capability statement support
- Compliance checklist + templates
- Bid consultation (1 session)

#### Growth Plan

Scale

**\$7,000 / year**

For teams that need more volume, more rhythm, and more strategic touchpoints.

- 2 proposals / month
- 6 matched opportunities / month
- Everything in Starter
- Grant writing & bid evaluation
- Weekly check-in calls

#### Elite Plan

Best value

**\$9,500 / year**

For teams that want senior attention around throughput, capture, and optimization.

- 3 proposals / month
- 10 matched opportunities / month
- Everything in Growth
- Monthly strategy session
- Dedicated capture support

### GSA and contract vehicle support

For organizations pursuing a contract vehicle, GSA can be positioned as a structured readiness and submission path instead of an opaque paperwork exercise. The work stays focused on strategy, packaging, and clean execution.

- GSA MAS Full Offer Submission • \$15,000
- GSA Option Renewal • \$7,000
- MAS Review / Eligibility • \$3,000 - \$4,000
- 5-Year Retainer • \$1,250 / month

## What these services do for a federal-ready business.

SAM, SBA certifications, and readiness work are often the administrative backbone of federal growth. Done well, they reduce delays, prevent avoidable rework, and make the company easier to trust when opportunities appear.

### Why this matters

These are not disconnected admin tasks. They are readiness infrastructure. The value is not just completion. The value is a cleaner path into opportunity.

- Cleaner reviewer experience
- Less preventable rework
- Faster next-step decisions
- Better consistency across systems and documents

#### SAM Registration

**\$750**

Federal registration support that keeps the entity profile clean and usable.

- Entity validation support
- NAICS / PSC alignment
- Profile readiness

#### WOSB / EDWOSB

**\$995 - \$1,250**

Support for women-owned certification paths that need eligibility review and clean packet structure.

- Eligibility review
- Evidence packet checklist
- Submission guidance

#### SDVOSB

**\$1,195 - \$1,495**

Certification readiness support for veteran-owned firms with packet organization and submission guidance.

- Eligibility review
- Evidence packet organization
- Submission guidance

#### HUBZone

**\$1,295 - \$1,495**

Support that confirms fit and builds a reviewer-friendly packet around location and employee mix.

- Location / employee review
- Evidence packet build
- Submission guidance

#### 8(a) Support

**\$3,995 - \$4,995**

Higher-touch support that helps a firm align its story, eligibility, and evidence before submission.

- Readiness review
- Narrative + evidence organization
- Submission guidance

#### Other Certifications from \$750

Support for additional certification paths where fit, evidence, and clean submission matter.

- Readiness guidance
- Evidence packet organization
- Submission clarity

#### Operational setup package • SAM + FEMA + Capability Package • \$2,000

One focused package for teams that need an operational federal profile quickly. Includes SAM support, FEMA vendor setup alignment, one professionally formatted capability statement, NAICS / PSC positioning review, and a submission-readiness handoff you can actually use.

## Tools that reduce friction when execution matters.

Not every organization wants only consulting. Some want a live opportunity search tool, a guided compliance platform, a freight training workflow, or practical support tasks that keep operations moving.

### **BidPulsar Platform**

Live federal opportunity search and alerts for organizations that want sourcing without blind searching.

- Federal opportunity search
- Live RFP alerts
- Useful for fit review and opportunity sourcing

### **CMMC Pulsar \$399 / year**

Guided compliance workflow for teams that want a structured CMMC Level 1 process.

- Scope + intake
- Gap review
- Evidence tracking
- Export-ready workflow

### **FreightPulsar \$1,250 / user**

Structured DoD freight training and workflow support for logistics organizations.

- Bidding platform walkthrough
- Operations workflow
- Billing and documentation practices
- Reference guides and templates

### **Additional practical support**

Some engagements begin with a smaller operational service that proves responsiveness and quality. These smaller offers can open the relationship and make larger support lanes easier to activate.

- Copyright Support • \$299
- Notary Services • from \$10
- Florida LLC Formation • approximately \$150

Start with the right lane, then move clean

# Start with the right lane. We will scope the cleanest path forward.

Some organizations need CMMC Level 1. Others need NIST, proposal support, SAM, certifications, GSA, or a platform that keeps the process visible. The goal is not to do everything at once. The goal is to choose the lane that creates trust fastest.

## Common starting points

- CMMC Level 1 or NIST SP 800-171 readiness
- CMMC Level 2 planning or a more mature cybersecurity path
- Proposal writing or grant writing support
- SAM registration or an SBA certification path
- GSA strategy, review, or full offer support

## Why companies choose us

A boutique firm that keeps the work senior, maps requirements early, and builds clean, reviewer-friendly packages tied to real outcomes.

- Every writer assigned to delivery has at least a bachelor's or master's degree
- Proposal and grant writers are Shipley certified
- CMMC guidance is backed by a Registered Practitioner
- The work stays senior-led from kickoff through submission

## Our promise

Crisp checklists. Reviewer-friendly structure. Language tied to real metrics. Never boilerplate. Requirement mapping, narrative development, compliance checks, and final packaging all stay aligned so the quality stays obvious from the beginning.

Senior-led

Lean and transparent

Built-in compliance

Your voice, not ours
